

# UNDER CONSTRUCTION

## Pile driving creates noise near bridges

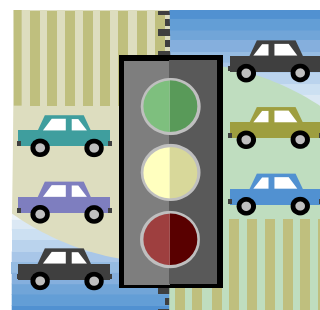

Got earplugs? During the past two weeks, Route 210 construction crews have been pounding steel beams into the ground at California Street south of Highland Avenue in San Bernardino (see photo below), generating a lot of noise. The same operation is set to start next week at State Street near Highland.

Known as "pile driving," the process is used to anchor foundations that support freeway bridges at these locations. The work will last several weeks, but will take place on weekdays only, from 7 a.m. to 5 p.m.

Once the work is done at State Street, crews plan to return to California Street for additional pile driving, or they may instead begin the operation at 27th Street.

SANBAG has notified residents and business owners of the work in this area.

## Coming soon: Improvements to Highland Avenue, State Street

Crews will be removing utility poles, a telephone booth, a billboard and signs near the intersection of Highland Avenue and State Street to prepare for the widening of these streets this summer.

The removals are set to start at the end of May, and construction in the area will last six to seven months. Intersection improvements will include:

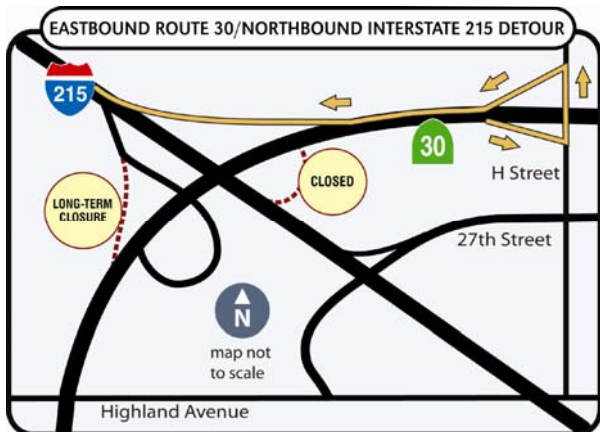

- A left-turn lane and a right-turn lane will be added to both northbound and southbound State Street.

- Both a left-turn lane and a right-turn lane will be added to eastbound Highland Avenue.
- Two left-turn lanes will be added to westbound Highland Avenue.

Access to businesses will be maintained during the construction period.

## Route 30 ramp to Interstate 215 to close at night

The eastbound Route 30 loop ramp to northbound Interstate 215 will close at night the week of May 23. The closure will occur from 9 p.m. to 5 a.m., Monday through Friday of that week.

Crews will be starting the widening of Route 30 to allow for the connection to the new Route 210.

Drivers should continue east past the loop ramp, exit at H Street, turn north on H and use westbound Route 30 to reach northbound I-215.

Stay tuned for information about additional future closures of this loop ramp.
